#               support@pcmdi.llnl.gov
#
# Description:  PCMDI Software System browser alter variable attributes popup.
#
# Version:      3.0
#
###############################################################################
#
#-----------------------------------------------------------------
# NOTE: need to use version of Python that imports Tkinter and Pmw
#-----------------------------------------------------------------
```

Modules

Numeric	gui_support.gui_color	browser.gui_menu	string
Tkinter	browser.gui_control	browser.gui_message	sys
cdms	browser.gui_defined_variables	math	vcs
cdtime	browser.gui_functions	os	

Classes

create

class *create*

```
    #-----------------------------------------------------------
    #
    # Start of Popup Dialogs
    #
    #-----------------------------------------------------------
    #
```

```
#----------------------------------------------------------------
# Modify Variable Attribute Popup
#----------------------------------------------------------------
```

Methods defined here:

__init__(self, parent)

attribute_apply(self, parent)

dimension_apply(self, parent)

evt_getfocus1(self, parent, event)

evt_getfocus2(self, parent, event)

evt_getfocus3(self, parent, event)

evt_getfocus4(self, parent, event)

execute(self, result)

remove_apply(self, parent)

rename_variable_apply(self, parent)

set_right(self, event)

Data

Pmw = <Pmw.Pmw_1_2.lib.PmwLoader.PmwLoader instance>
